DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Regarding claim 4, the phrase "for example" or "(eg di-)" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Berger et al (6,043,391).

Art Unit: 1751

Berger et al disclose an anionic surfactant composition in liquid form comprising aromatic or substituted aromatic sulfonic surfactants such as dialkyl benzene sulfonate and a branched alkyl benzene sulfonate (see abstract and example 7 and claims 1-4).

As this reference teaches all of the instantly required it is considered anticipatory.

6. Claims 1-5 and 7 rejected under 35 U.S.C. 102(b) as being anticipated by DE 1234708.

DE '708 discloses a detergent composition having an aromatic sulfonic surfactant; and ethoxylated nonionic surfactants. (see examples 2 and 8-14).

As this reference teaches all of the instantly required it is considered anticipatory.

7. Claims 1-4, 7-10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Nemeth et al (3,528,923).

Nemeth et al disclose a lime soap dispersant comprising an aromatic sulfonated surfactant (col. 1, lines 42-62). Nemeth et al further teach the inclusion of additional surfactants such as alkyl benzene sulfonates and ethoxylated nonylphenols in amounts less than 50% by weight (col. 3, lines 5-50).

As this reference teaches all of the instantly required it is considered anticipatory.

8. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Suter (2,366,133).

Suter discloses an olefin sulfonic acid aromatic compound of the formula (col. 1, lines 50-col. 2, line 5). See also claims 1-5.

As this reference teaches all of the instantly required it is considered anticipatory.

Art Unit: 1751

9. Claims 1 and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 99/05243.

WO '243 discloses an aromatic alkyl sulfonate detergent components comprising builders and cationic surfactants (see claim 1 and page 33).

As this reference teaches all of the instantly required it is considered anticipatory.

Double Patenting

10. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

11. Claims 1-12 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-6 and 1-7 of U.S. Patent No. 5,389,284 and 4,950,424, respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because they overlap in subject matter

Art Unit: 1751

pertaining to aromatic sulfonic acid surfactants in combination with surfactants and other builders.
